

# ABORTION HEALTH PROFILE

## COMOROS 2019

### 1. General Statistics

Total population (000's), 2019	851
Total female population (15 - 49 years) (000's), 2019	210
Unintended pregnancies (000's), 2019	10
Adolescent birth rate (per 1000 women aged 15-19 years), 2011	70
Proportion of women who make their own informed decisions regarding sexual relations (% of women aged 15-49 years), 2012	47
Total fertility rate 15-49 (births per woman), 2012	4

### 2. Legal status of abortion

	No	Yes
On request	×	
For economic or social reasons	×	
In cases of foetal impairment	×	
In cases of incest	×	
In cases of intellectual/cognitive disability of the woman	×	
In cases of rape	×	
To preserve a woman's health	×	
To preserve a woman's mental health	×	
To preserve a woman's physical health	×	
To save a woman's life	×	
Other		✓

### 3. Causes of maternal death (2017)

### 4. Maternal mortality ratio (2010- 2017)

### 5. Annual average rate of reduction: 2010-2017 vs 2010-2030

Current AARR in MMR	3.2%
Expected AARR to reach MMR target 2030	5.5%

### 6. FP indicators and unsafe abortions averted due to modern contraceptive use

**Legend**

- Contraceptive prevalence - modern methods (%)
- Demand satisfied for modern contraception (%)
- Unmet need for family planning (%)
- Unsafe abortions averted (000's)

### 7. Available in National Essential Medicines List - (Null)

Misoprostol	<input type="radio"/>
Mifepristone	<input type="radio"/>
Misoprostol + Mifepristone combination	<input type="radio"/>

### 8. Post-abortion contraceptive acceptance

### Definitions and abbreviations

**Unsafe abortions averted due to modern contraceptive use:** Number of unsafe abortions that did not occur during a specified reference period as a result of the protection provided by modern contraceptive use during the reference period.

**Contraceptive prevalence - Modern Methods:** Percentage of women of reproductive age who are using (or whose partner is using) a modern contraceptive method at a particular point in time

**Unmet need:** percentage of fecund women of reproductive age who want no more children or to postpone having the next child, but are not using a contraceptive method, plus women who are currently using a traditional method of family planning

**FP** - Family planning, **MMR** - Maternal Mortality Ratio
