

ABORTION HEALTH PROFILE

ZAMBIA 2019

1. General Statistics

Total population (000's), 2019	17,861
Total female population (15 - 49 years) (000's), 2019	4,349
Unintended pregnancies (000's), 2019	577
Adolescent birth rate (per 1000 women aged 15-19 years), 2017	135
Proportion of women who make their own informed decisions regarding sexual relations (% of women aged 15-49 years), 2014	71
Total fertility rate 15-49 (births per woman), 2018	5

2. Legal status of abortion

	Not specif..	Yes
On request	<input type="radio"/>	
For economic or social reasons	<input type="radio"/>	
In cases of foetal impairment		<input checked="" type="checkbox"/>
In cases of incest	<input type="radio"/>	
In cases of intellectual/cognitive disability of the woman	<input type="radio"/>	
In cases of rape	<input type="radio"/>	
To preserve a woman's health	<input type="radio"/>	
To preserve a woman's mental health		<input checked="" type="checkbox"/>
To preserve a woman's physical health		<input checked="" type="checkbox"/>
To save a woman's life		<input checked="" type="checkbox"/>
Other		<input checked="" type="checkbox"/>

3. Causes of maternal death (2017)

4. Maternal mortality ratio (2010- 2017)

5. Annual average rate of reduction: 2010-2017 vs 2010-2030

Current AARR in MMR	5.1%
Expected AARR to reach MMR target 2030	5.5%

6. FP indicators and unsafe abortions averted due to modern contraceptive use

Legend

- Contraceptive prevalence - modern methods (%)
- Demand satisfied for modern contraception (%)
- Unmet need for family planning (%)
- Unsafe abortions averted (000's)

7. Available in National Essential Medicines List - (2015)

Misoprostol	<input checked="" type="checkbox"/>
Mifepristone	<input checked="" type="checkbox"/>
Misoprostol + Mifepristone combination	<input checked="" type="checkbox"/>

8. Post-abortion contraceptive acceptance

Definitions and abbreviations

Unsafe abortions averted due to modern contraceptive use: Number of unsafe abortions that did not occur during a specified reference period as a result of the protection provided by modern contraceptive use during the reference period.
Contraceptive prevalence - Modern Methods: Percentage of women of reproductive age who are using (or whose partner is using) a modern contraceptive method at a particular point in time
Unmet need: percentage of fecund women of reproductive age who want no more children or to postpone having the next child, but are not using a contraceptive method, plus women who are currently using a traditional method of family planning
FP - Family planning, MMR - Maternal Mortality Ratio
