Republic of Zimbabwe					63	78	78	75	74	74

## Summary Notes:

Source: WHO-UNICEF Estimate of National Immunization Coverage (WUENIC), 2021 revision.

- Coverage of Measles-containing-Vaccine second dose has reduced from 76% in 2012 to 61% in 2021 in Africa.
- Coverage of Measles-containing-Vaccine second dose has remained consistently low in the last decade between 2012 and 2021 for most countries in Africa.
- Only two countries in Africa (Republic of Tunisia, Arab Republic of Egypt) have consistently achieved the target in the last decade. Republic of Seychelles despite maintaining above the target had a decline in coverage in 2021.
- There is indication of lack of data in many countries on coverage of Measles-containing-Vaccine second dose which may be due to poor reporting.

**Legend**  
Coverage Estimate (%)

- 0 - 80
- 80 - 90
- 90 - 99
- No data
